Current admissible output
A constrained no-go or planning memo.
No bound improvement claim, no achieved H1 structural claim, and no benchmark-backed H2 or H3 comparison claim are currently justified.

Deterministic repository counts
11 concept folders
5 promoted bridges
0 of 7 H1 output artifacts present
0 of 8 named benchmark rows executed

Every quantity in this dashboard is an exact repository measurement rather than a stochastic estimate. Confidence intervals are therefore not applicable.
